SUMMARY

Financial analyst with 2.5+ years building Power BI dashboards, KPI reporting, and driver-based forecasting models across a \$100M+ portfolio. Recovered \$1M by tracing root-cause anomalies in budget-vs-actuals data. Proficient in Power BI (DAX, KPI dashboards), SQL, Excel, Python, and Tableau, backed by an MS in Business Analytics from the University of Miami.

EDUCATION

University of Miami

Master of Science in Business Analytics

May 2026

Coral Gables, FL

- **Relevant Coursework:** Dashboard Visualization, Database Management Systems, Statistical Analysis with Python, Business Analytics Consulting, Forecasting, Applied Regression Analysis

Florida State University

Bachelor of Science in Finance

May 2025

Tallahassee, FL

- **Relevant Coursework:** Financial Modeling, Financial Statement Analysis, Corporate Finance, Business Analytics, Investments, Portfolio Management

EXPERIENCE

Financial Analyst

Bridgelight LLC

Jan 2024 – Present

Miami, FL

- Streamlined planning cycles across a **\$100M+** revenue portfolio by building driver-based, scenario-ready forecasting models in Excel (Power Query, PivotTables, XLOOKUP, data tables) that projected revenue, expenses, and profitability.
- Recovered **\$1M** in revenue by researching and reporting on budget-vs-actuals variances across cost centers (reconciliations > **\$500K**), identifying root-cause anomalies, and briefing Accounting leadership.
- Enabled scheduling optimization and shared staffing across virtual sites by building staffing models (headcount, start/termination dates) that fed into the main forecasting model.

Data Intelligence Intern

City National Bank (Graduate Capstone)

February 2026 – May 2026

Miami, FL

- Supported financial and operational decision-making by building and enhancing Power BI dashboards with DAX measures and KPI calculations.
- Improved reporting efficiency by transforming and optimizing datasets in Power Query, removing redundant fields and aligning structures with leadership-confirmed business needs.
- Improved visibility into key business drivers by designing visualizations of performance trends, utilization metrics, and operational variances.

Business Analyst Intern

Costa Farms

June 2023 – July 2023

Miami, FL

- Informed leadership's decision to discontinue an unprofitable product line by building a Power BI dashboard breaking down COGS into 10+ cost components (freight, rebate, service, shipping, labor, royalty) at the product level.
- Gave category managers their first single dashboard for decisions by building drill-down views from macro category to individual SKU, isolating which specific drivers were moving each number.
- Mapped fertilizer sourcing/pricing; surfaced ~3–5% savings and standardized reporting; trained sales leadership.

PROJECTS

Event Ticketing Database

Database Management Systems

Spring 2026

SQL, ERD, Relational Database Design

- Designed a normalized SQL database with ERD and constraints to manage ticket sales, inventory, transfers, and customer segmentation.
- Built analytical queries tracking revenue, attendance, and inventory availability to support business reporting.

AI Resume Matcher

Large Language Models

Spring 2026

Python, OpenAI API, GPT-4o, pdfplumber, JSON

- Contributed to an AI resume-matching tool built with a team, using GPT-4o and pdfplumber to generate structured outputs (match score, skill gaps, ATS keywords) evaluating resume-job fit.
- Helped design a multi-job ranking loop with temperature-0 scoring for consistency, and fixed a hardcoded API-key security issue by migrating credentials to environment variables.

SKILLS

Technical: Excel, Power BI (DAX), Tableau, SQL, Python, R, Power Query, DBeaver
